

# Super/Motocross Data

Google. (n.d.). *Google trends*. Google Trends. Retrieved February 1, 2023, from <https://trends.google.com/trends/explore?hl=en-US>

This data contains google searches of keywords that are supercross or motocross. This data is important to me because I have a large interest in this industry. I am interested in the google searches because I know the sport is fairly small and I'm curious about the growth of the sport over the last couple years because I think it has grown a lot over the last couple of years. I have both Supercross and Motorcross google searches over the last 5 years. I also want to see the difference between supercross interest and motorcross interest because I believe supercross to be the bigger discipline of dirtbike racing.

Columns of data

Category: All categories

Date and time interval of google searches in that time frame for Supercross and Motocross
